With the ever-changing automotive technical world, liquid wraps have become a new favorite among OC consumers. In this 5-month, 20-week, intensive program students will learn all aspects of the professional custom coating industry including proper techniques, safety, color mixing, pearls, and color shifts as well as proper vehicle maintenance from the industries best. If you are new to the automotive painting world or want to certify your existing shop, this program is the first of its kind. Internship possibilities.
